DIGISCHOOL | Mastering Digital Learning Tools in Vocational Education and Training

1st Newsletter, November 2022

ERASMUS+ PROJECT that aims at teachers, trainers and VET educators to strengthen their key competencies in the field of digital literacy.

THE PROJECT FOCUSES on finding and introducing new approaches, practices, and modes of blended learning in VET.
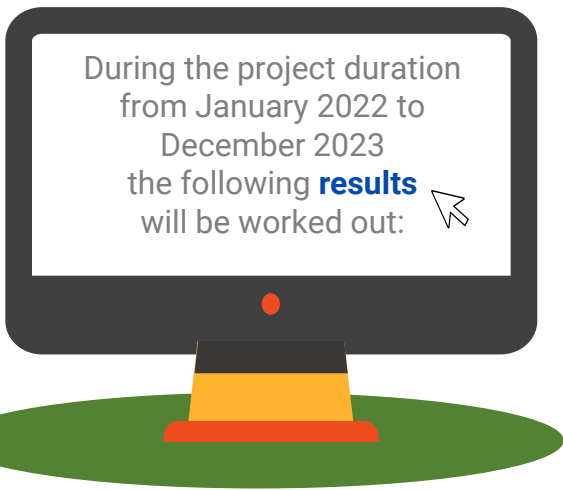

ANOTHER IMPORTANT aspect is to improve positive perceptions and motivation for the use of digital technologies and to exchange knowledge, practices, and experiences among European teachers and educational organizations.

Kick-off Meeting
Schwerin, 01/2022

1st Learning, Teaching, Training Activity
Schwerin, 10/2022

During the project duration from January 2022 to December 2023 the following **results** will be worked out:

1. DigiCases
Set of different educational materials for innovative ways of using digital and online tools in education

The final report of the collection of case studies in the application of digital tools for learning in the partner countries was prepared. The report is currently being translated into the relevant languages and will then be published.

2. DigiToolbox
Complex set of online tools for enhancing vocational lessons with a special focus on the boost of the entrepreneurial mindset and focus on adaptation to key competencies

The toolbox is almost finished. It consists of 52 tools with a practice-oriented description of function, application possibilities, tips and tricks as well as benefits of use. Currently, there will be made last adjustments. We expect this project result to be completed by the end of this year.

Comin' up:

3. DigiTube
Micro-learning units with step-by-step instructions on how to include and use innovative digital tools in practical classes of vocational education

4. DigiHub
Centralized learning platform providing the developed learning materials and microlearning units
